

Online Training Solutions

Almost afraid to ask **"Could it get any hotter?"**

We are. This extreme warm weather makes it the perfect time to sit in an air-conditioned room with an internet-connected computer and learn something new, refresh and reinforce knowledge, and shore up your summertime safety.

Following are client-favorite courses chosen for this time of year:

102...109...99.

Air temperatures right now across the USA.

Factor in the Heat Index and that 102 becomes **111!** That's **HOT!**

102 in South Dakota
109 in Las Vegas
99 in New York City

That's why this month's featured course is **"Working in Extreme Temperatures"**. This course covers temperature-related illnesses and preventative measures, first aid measures, and more. Prepare yourself for the outdoors with new knowledge or refresh your knowledge on how to handle being hot, hot, hot!

Don't Text And Drive!

Don't you **hate** seeing people of all ages **text** while behind the steering wheel of a vehicle? Hate is a strong word, but even at a stop light, texting is just not smart. In fact, texting while driving is banned in a number of states and will soon be illegal in a majority of states.

Losing privileges is better than losing lives.

During the summer there are more drivers on the roads at all times of the day. Every day is a good day to learn new or updated skills when it comes to **Defensive Driving**. We offer affordable online courses to help drivers learn more and stay knowledgeable, including Defensive Driving in both English and Spanish, International Defensive Driving, National Safety Council Defensive Driving, Light Truck Defensive Driving, Motorcycle Safety, and more.

Digging is so much fun, especially in the summer when the ground isn't frozen! Hence, more excavation and trenching accidents occur during the summer months than at other times of the year.

Now is the perfect time to take the time to learn about **Trenching & Excavation Safety** via our 60 minute online course that covers confined space requirements, site assessment, safety principles, causes of fatalities, types of excavation, and more. Whether you excavate and trench for a living, or you're digging up your own back yard, this is a course worth your time.
