

Online Training Solutions

Learning: to gain knowledge or skill by study; an ongoing process that should not ever stop.

Because it isn't just about learning...it's about results.

In this issue:

- ◆ #\$\$%! Door Mat - Safety **IS** for Everyone
- ◆ Shaken, Not Stirred
- ◆ Inside FNL Updates: DVIT, Certified Courses, & more!

JUNE IS...

...National Safety Month. I tripped on a #\$\$%! door mat this morning and thought of that. It's a door mat that I have stepped on every working day for four years. Today it had a corner flipped over and I wasn't watching where I was walking. I almost became one of the stats for the **#1 injury in the USA - a Slip, Trip, and/or Fall (STF)**. Time for me to refresh my knowledge, which WILL make me more aware of hazards to watch out for and may save me from a STF, which will in turn save me and my company money and time. A very good result!

"Refresh knowledge" -- one of those items that falls into the "Ongoing Learning" category and effects results. FirstNet Learning began 12 years ago offering health and safety training. Over the years our catalog has grown to include over 2,500 online courses in additional areas, but we haven't abandoned our safety training roots. In fact, we've made them stronger by adding hundreds of courses focused on safety, from Arc Flash Awareness to Working Outdoors in Warm Weather. No matter your job, no matter where you work, safety IS for everyone.

Celebrate National Safety Month by learning something new or simply refreshing your safety knowledge, and enjoy the results.

SHAKEN, NOT STIRRED

You may think of 007 when you hear that phrase. We think of blended learning.

While online learning can stand alone, most often it is part of a blended learning solution that includes learning in classrooms, via webinars, mobile, and electronic mail. When you choose an LMS or LCMS, make sure to choose a system that supports not only these functions but more, such as Resource Management, Policy Management, and Event Management Modules. One size LMS never fits all. Custom blend the functions you need.

At FirstNet Learning, we like to 'shake things up', advancing the capabilities of our learning system to not just keep up with technology, but to stay on top of - and preferably way ahead of, technology. "What if...?" is a phrase we ask often. Shaking things up is fun and challenging, and often results in innovative new products and services.

We invite you to see what's shakin' at FirstNet Learning. [Schedule a demo](#) and let us answer a "what if?" or two for you.

Delaware Valley Insurance Trust Launches DVIT Online University

DELAWARE VALLEY MUNICIPAL MANAGEMENT ASSOCIATION
DELAWARE VALLEY TRUSTS

The Delaware Valley Trusts are risk sharing pools owned, operated, and controlled by 80 units of local government in southeastern Pennsylvania. One of three trusts, the Delaware Valley Insurance Trust is a regional municipal risk sharing pool providing property and liability coverage to participating members. Their mission is to deliver trustworthy results through superior benefits, coverage and risk-management services.

As part of that pledge, they've introduced **DVIT Online University** -- an online training tool from FirstNet Learning that will empower members to increase their knowledge, protect their employees, and reduce the frequency and severity of accidents and injuries. DVIT Online University features courses carefully selected and tailored to address the needs of member employees throughout each entity. The university contains WorkPlace Colleges focused on municipal areas such as Administration and General Office, Parks and Recreation, Public Works and Utilities, Police-Fire-EMS, and Waste Management, and populated with courses chosen specifically for member employees.

Learn more about FNL's expertise in providing online learning solutions specifically for municipalities and risk-sharing organizations - [contact us and/or schedule a demo](#).

Certification Training Online

Many of our courses are certified for continuing education credit, from organizations such as University of Phoenix, Human Resource Certification Institute (HRCI), and the Project Management Institute (PMI). Additionally, if you have Water/Wastewater employees, we have online training for you! In many states, and more being added constantly, your employees can affordably and easily train online to achieve the CEU's they need. [Contact FNL](#) for more information!

Everyone Home Safely in Nampa, ID

That is the goal of the training Nampa, Idaho employees receive. Having recently launched their online university, the City of Nampa just added thirty more courses, including "*Supervisor Safety Awareness*" and "*Accident Incident Investigation*", and has requested that all supervisors and department heads complete these two courses within 45 days. Way to go, City of Nampa, for making employee safety a priority!

June is also Effective Communications Month

Interesting that just one month of the year is designated to celebrate effective communications, as communicating takes place all 365 days of the year! What if we communicated effectively EVERY day? Think of the time and money and emotions that would be saved. FNL offers a variety of online courses to teach communication skills, from "*Achieving Communication Effectiveness*" to "*Hazard Communications*" to "*Managing Others - Communicating*". In as little as 30 minutes you can learn tips and tools to communicate more effectively, at work and at home. [View our course catalog now!](#)
